KEY ACHIEVEMENTS

Recognition

Received Pat on the Back recognitions for ownership, problem-solving, and delivery excellence.

Process Improvement

Reduced operational workload through automation initiatives, improving team productivity and response times.

Project Leadership

Independently delivered multiple customer projects with minimal supervision.

Production Reliability

Supported mission-critical production environments, deployments, and incident management activities.

EDUCATION

Bachelor of Computer Science

University Institute of Technology
2020 - 2023 Thiruvananthapuram, India

SKILLS

Java · SQL · Spring Boot · JFrog Artifactory ·
Spring Framework · Hibernate · REST APIs ·
Maven · Oracle Cloud Infrastructure (OCI) ·
Docker · Git · GitHub Actions · Jenkins ·
CI/CD Pipelines · Linux Administration ·
Application Deployment ·
Environment Management · MySQL ·
PostgreSQL · Power Automate ·
Process Automation · Scripting ·
Workflow Automation · Android Studio ·
Firebase · Jira · Zendesk · Postman ·
GitHub

TRAINING / COURSES

SpringBoot Development Internship

Canddella , Sniqsys Technosphere Pvt Ltd

SUMMARY

Software Engineer with experience in enterprise application development, production support, cloud infrastructure, deployment management, automation, and web/mobile application development. Skilled in Java, Spring Boot, Oracle Cloud Infrastructure (OCI), CI/CD pipelines, Docker, Linux, and REST APIs. Experienced in handling production deployments, troubleshooting critical incidents, building automation solutions, and collaborating directly with clients. Passionate about scalable systems, cloud technologies, DevOps practices, and full software development lifecycle management.

EXPERIENCE

Software Engineer

10/2024 - Present

Zafin

Trivandrum, India

- Managed end-to-end production deployments for enterprise banking applications across multiple and cloud-hosted environments, ensuring stability and high availability.
- Performed root cause analysis and resolved critical production incidents, reducing recurring issues through permanent fixes.
- Designed and implemented complex data loading procedures and backend enhancements using Java, Spring Framework, Maven, and Oracle technologies.
- Collaborated directly with clients during production releases and incident resolution, enhancing client satisfaction and post-deployment validation.
- Independently owned and successfully delivered three customer projects with minimal supervision.
- Participated in release planning, deployment validation, rollback procedures, and supported production, improving system reliability.
- Worked with Jenkins, Maven, JFrog Artifactory, and deployment pipelines as part of enterprise release management activities.

zafin.com

Application Support Engineer

08/2023 - 09/2024

Zafin

Trivandrum, India

- Monitored and supported mission-critical production workloads across multiple business regions.
- Developed Java-based automation utilities that eliminated repetitive operational tasks and improved support efficiency.
- Built Excel and scripting-based automation solutions, reducing manual effort by over 50%.
- Utilized Power Automate and cloud-based workflows to streamline operational processes.
- Performed log analysis, troubleshooting, incident management, and stakeholder communication during critical production events.
- Contributed to process automation and continuous improvement initiatives within support operations.

zafin.com

Software Engineering Intern

04/2023 - 08/2023

Canddella, Sniqsys Technosphere Pvt Ltd

Trivandrum, India

- Developed backend modules for a Product & Customer Relationship Management (CRM) platform using Java, Spring Boot, Maven, and MySQL.
- Designed RESTful APIs and business logic components for customer and inventory management.
- Implemented database operations, reporting modules, and analytics features to improve product sales visibility.
- Participated in requirement analysis, development, testing, debugging, and deployment activities following SDLC practices.

TRAINING / COURSES

ZAFIN AI BUILD DAY 2026

Built a Client Health Monitoring Dashboard leveraging OpenAI APIs, sentiment analysis, and Zendesk support data to generate customer health scores, identify support trends, and proactively detect escalation risks.

CLOUD & DEVOPS EXPERIENCE

CLOUD & DEVOPS

- Experience working with Oracle Cloud Infrastructure (OCI) services and cloud-hosted enterprise applications.
- Hands-on experience with deployment management, release activities, environment configuration, and application monitoring.
- Familiar with CI/CD pipeline implementation using GitHub Actions and Jenkins.
- Experience working with Linux servers, Docker containers, Git version control, and build automation tools.
- Knowledge of infrastructure management, application lifecycle management, and production support best practices.
- Experience troubleshooting deployment failures, environment issues, and production incidents.

INTERESTS

AI & Automation

Exploring Generative AI, workflow automation, and AI-powered business solutions.

Cloud & DevOps

Passionate about Oracle Cloud, CI/CD pipelines, containerization, and deployment automation.
